

Karol Chrobok

Junior JavaScript Developer

I'm looking for an opportunity to start my career as a JavaScript developer and rise into fullstack developer. I have been looking for the right path for long time and now I know it's the backend based on Node.js

Skills:

HTML CSS JavaScript SASS Node.js Express.js Github VSCode Postman

In progress:

MongoDB TypeScript React

Language:

English - B2 Polish - Native

Projects:

My website ([Online](#) / [Github](#))

Tech stack: [React](#) [TypeScript](#) [Node.js](#) [Express.js](#) [MongoDB](#)

Description: My personal website in MERN's stack with TypeScript. Page presents all information about my person and has a module to generate new CV document on every single change in data about me. I used React to create SPA and connect it with a database using a simple REST API.

Experience:

Junior Frontend Developer

(Meetmedia Sp. z o.o. - 8 months, remote)

Tech stack: [HTML](#) [CSS](#) [SASS](#) [JavaScript](#) [jQuery](#)

Responsibility: I created the website code based on ready-made graphics. I contacted clients regarding comments on the website being created. I managed the team and distributed tasks among developers. I transferred and installed ready-made projects to the client's server.

Main projects: [Bezuzyteczna Thalgo](#)
